EUROPHYSICS JOURNAL

THE INSTITUTE OF PHYSICS

Copyright © 1970 by the Institute of Physics and individual contributors. All rights reserved.

Under Part 1, Section 7 of the Copyright Act 1956 some libraries are permitted to make single copies of articles for indivuals requiring them for the purpose of research or private study. The classes of library accorded this privilege and the conditions under which it is availabe are set out in the Act and in the associated Board of Trade regulations (Statutory Instruments, 1957, No. 868). Most libraries attached to higher educational establishments and research organizations, whether in the UK or elsewhere, qualify for this privilege provided that they were not established, and are not conducted, for profit. The Act, however, restricts the concession to material not exceeding one article in any one publication and requires that the individual making use of the service must pay at least the cost price of producing the copy.

Except for single copies covered by the concession relating to research and private study no part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without permission of the copyright owners.

Published by The Institute of Physics, 47 Belgrave Square, London SW1, England, in association with the American Institute of Physics.

Journal of Physics A: General Physics is published as a bi-monthly journal. Details are available on request.

Printed in Great Britain by J W Arrowsmith Ltd. Set in 11/12pt Imprint.

Contents

NO 1 JANUARY 1971

Letters to the editor

L1 *R V Jones* · Aberration of light in a moving medium
L3 *M W Kermode* · Numerical calculation of the S-state energy eigenvalues for a local potential
L6 *J Strnad* · Comments on the paper: Time measurement using a realizable atomic clock
L8 *W H McCrea* · Time measurement: Criticism of a paper by L M Stephenson
L14 *D K Bedford* · Impact ionization of micro-particles at low velocities
L18 *J C Barton* · Aperture of counter telescopes for parallel pairs of particles

Papers

1 *S F Edwards and M A Oliver* · The Stokes resistance for a polymer chain
11 *S Simons* · On entropy production for an isolated system
17 *J Krishna Rao* · Radiating Levi-Civita metric
21 *I B Whittingham* · Incoherent scattering of gamma rays in heavy atoms
38 *F D Gault* · Photoproduction, s-channel helicity conservation and Regge cuts in the t-channel
44 *D Mahanti, H L Yadav and B K Srivastava* · The binding energy of the alpha particle with a velocity-dependent potential containing a tensor component
49 *H L Yadav, D Mahanti and B K Srivastava* · The photodisintegration of helium
55 *P H Roberts and J Grant* · Motions in a Bose condensate—I: The structure of the large circular vortex
73 *J Lee* · On Phythian's perturbation theory for stationary homogeneous turbulence
77 *M V Berry and S R Reznek* · A simple theory for the densities of coexistent liquid and vapour through the transition region
85 *T E R Jones and K Walters* · The behaviour of materials under combined steady and oscillatory shear
101 *J M Savirón, M A Hidalgo, J C Yarza and D Gonzalez-Alvarez* · The FJO thermal diffusion column theory and the thermal diffusion factor
105 *D E G Williams* · The work function of an electron gas
108 *P C Stangeby and J E Allen* · Current limitation in mercury vapour discharges—I: Theory
120 *B E Keen and R V Aldridge* · Suppression and enhancement of a 'drift-type' instability in a magnetoplasma by a feedback technique

142 *J G Andrews and D T Swift-Hook* · Spherical probe in a flowing plasma

158 **Book reviews**

161 **Book notices**

NO 2 MARCH 1971

Letters to the editor

L21 *D T Swift-Hook and J G Andrews* · Cylindrical probe in a flowing plasma
L25 *F Watt, J W Hand and E E Schneider* · A controlled avalanche cause by electron cyclotron acceleration
L27 *S P Gary* · Instabilities in perpendicular collisionless shock waves
L31 *F Ashton and J King* · The electric charge of interacting cosmic ray particles at sea level
L34 *J Wdowczyk and A W Wolfendale* · Muon bundles in extensive air showers
L37 *J Wdowczyk, W Tkaczyk, C Adcock and A W Wolfendale* · The possibility of detectable fluxes of cosmic ray γ rays with energy above 10^{19} eV

Papers

165 *D K Saraswati* · Quantum electrodynamics in an analytic representation
184 *D S Chellone* · Wave tails in Born–Infield electrodynamics
197 *S J Lewandowski* · Electromagnetic field equations for anisotropic media
206 *C D Collinson* · A theorem on the local isometric embedding of empty space–times in a space of constant curvature
208 *J B Griffiths and R A Newing* · Geometrical aspects of the two-component neutrino field in general relativity
214 *D Husain* · Separable potentials and Coulomb interactions
217 *A F Omojola* · The binding energy of the alpha particle ^{4}He
231 *R Horák, L Mišta and J Peřina* · Approximate formulae for the superposition of coherent and chaotic fields
238 *G I Peters and L Allen* · Amplified spontaneous emission—I: The threshold condition
244 *R W Moore, K J M Moriarty and J H R Migneron* · A Regge quark model for $O^{-}\frac{1}{2}^{+} \rightarrow O^{-}\frac{1}{2}^{+}$ scattering
276 *C Adcock, R B Coats, A W Wolfendale and J Wdowczyk* · Theoretical analysis of extensive air showers—V: General analysis of muons above 1000 GeV
291 *B W Keck and J G Taylor* · On the equivalence theorem for S-matrix elements
298 *A M Arthurs and C W Coles* · Upper and lower bounds on generalized scattering lengths
306 *J B Griffiths and R A Newing* · Neutrino radiation fields in general relativity

309 **Book reviews**

310 **Book notices**

NO 3 MAY 1971

Letters to the editor

L41 *R K Bullough and P J Caudrey* · Generalized nonrelativistic Lamb-shift theory

L45 *J Trümper and M Samorski* · Comments on the paper 'High transverse momenta observed in air shower cores'

L47 *M Bertolotti, B Crosignani, B Daino and P Di Porto* · The possibility of measuring spatial velocity correlation functions in a turbulent fluid by means of light scattering

L50 *M W Kermode and P E Nunn* · Numerical calculation of the energy eigenvalues for a local potential

L52 *B K Agarwal, C P Singh, K J Narain and A B Saxena* · $K^- p \to K^+ \Xi^-$ process in the two-meson-exchange peripheral model

L56 *E Jakeman and E R Pike* · The spectral linewidth of laser noise and of fluctuations near other second-order phase transitions

L58 *S Simons* · On the time variation of entropy

L59 *I G Main, B T McCrone, B E Crossfield, C K Davis, G D Jones and P J Twin* · Isospin structure of an $E2$ transition matrix element in ^{27}Al and ^{27}Si

Papers

313 *J M Radcliffe* · Some properties of coherent spin states

324 *V Bezák* · The partition sum of an ideal gas in a random potential

328 *M L Chaudhury* · A model of nonlocal potential and alpha decay of deformed even nuclei

346 *B A Logan* · A crossover phenomenon in the photoelectric effect

352 *F Ashton, H J Edwards and G N Kelly* · The spectrum of cosmic ray neutrons at sea level in the range 0·4–1·2 GeV

367 *P Kiraly, M G Thompson and A W Wolfendale* · Cosmic ray showers produced by muon bremsstrahlung

377 *L Allen and G I Peters* · Amplified spontaneous emission—II: The connection with laser theory

382 *N R Ogg* · A Huygen's principle for anisotropic media

389 *C N Lashmore-Davies* · Stabilization of a low-density plasma in a simple magnetic mirror by feedback control

401 *G T Roberts* · The diffusive flow of gases between two parallel plates

413 *W G S Scaife* · Relative permittivity of organic liquids as a function of pressure and temperature

426 *I J Kirby and J Wilks* · Zero sound in liquid ^{3}He

434 *S S Mathur, P N Gupta and S C Sinha* · Theoretical derivation of Wada's and Rao's relations

437 *V K Jaiswal* · Thermal conductivity of polyatomic gaseous mixtures at elevated temperatures

Book reviews

439 *J Schwinger* · Particles, sources and fields

440 *E Roubine* · Mathematics applied to physics

L105 *R D Scott* · The effect of atomic excitation on the shape of the ^{3}H beta spectrum near the end point
L109 *P Ray Chaudhuri* · Elastic scattering of electrons by solar neutrinos and weak interaction theories
L111 *R A Cairns* · Explosive instability in a collisionless shock
L114 *P Hutchinson, M Ross, P Schofield and W R Conkie* · Fluid order and freezing

Papers
749 *M C Durgapal and G L Gehlot* · Spheres with varying density in general relativity
756 *C D Collinson* · Special quadratic first integrals of geodesics
761 *M Cohen and T Feldmann* · Lagrange multipliers and bounds to quantum mechanical properties
773 *G J Papadopoulos* · Magnetization of harmonically bound charges
782 *D L Misell* · Image formation in the electron microscope I. The application of transfer theory to a consideration of elastic electron scattering
798 *D L Misell* · Image formation in the electron microscope II. The application of transfer theory to a consideration of inelastic electron scattering
813 *D F Walls* · Quantum theory of nonlinear optical phenomena
827 *E Jakeman, C J Oliver and E R Pike* · Clipped correlation of integrated intensity fluctuations of gaussian light
836 *P C W Davies* · Extension of Wheeler–Feynman quantum theory to the relativistic domain I. Scattering processes
846 *T M Aye* · Reggeized differential cross sections for fermion-exchange processes in the covariant formalism
856 *A P Patro and P Sen* · Parapositronium lifetime
859 *C S Lai and S Y Lo* · Sum rule for e^{+}–e^{-} annihilation and $U(3) \otimes U(3)$ symmetry breaking
868 *S C Tonwar and B V Sreekantan* · Time structure of hadrons in extensive air showers and models of high energy hadron interactions
883 *R C Johnson* · Theory of πK scattering near threshold
888 *A J Curran* · The dispersion energy relation for ultra-high energy nuclear reactions in emulsion
895 *F Ashton, R B Coats, J King, K Tsuji and A W Wolfendale* · Search for quarks using a flash tube chamber
908 *D C Bailey, P E Carr, J L Durell, A N James, M W Greene and J F Sharpey-Schafer* · Decay and lifetimes of levels in ^{21}Ne
918 *M G F Dias, M F da Silva and C M da Silva* · Rotational properties of the ^{24}Mg doublet at 2·7 MeV
923 *S S De and K De* · Weak interaction of photons and the process $\nu + Z \rightarrow \nu + Z + \lambda^{+} + \lambda^{-}$
928 *K Srinivasa Rao* · Analogues of giant resonances and photoproduction of positive pions from ^{16}O
934 *R Rosa* · Ion transit time effects in the plasma sheath
944 *S K Bhattacharyya, P K Bandopadhyay and A K Barua* · Heat conductivity of the nonpolar–polar gas mixtures Ar–CH_3Cl and Xe–CH_3Cl
952 *C S M Doake and P W F Gribbon* · Ion motion in liquid nitrogen
